Prevalence of restless legs syndrome in North American and Western European populations: A systematic review

Sleep Medicine, 12(7), 623-634 - July 2011
<https://doi.org/10.1016/j.sleep.2010.12.018> ↗

Authors

Abstract

BACKGROUND: Restless legs syndrome (RLS) is a potentially debilitating sleep disorder that affects a significant percentage of North American and European adults. Although standardized RLS diagnostic criteria are now established and widely accepted, reported prevalence estimates have varied widely. In this paper, we review the literature regarding RLS prevalence in North American and Western European adult populations, examine potential sources of variation, briefly discuss the impact of RLS, and offer recommendations for future research. METHODS: To identify qualifying studies, we searched 6 scientific databases and scanned bibliographies of relevant review papers and all identified articles. Studies including fewer than 300 participants, that did not use any of the 4 standard diagnostic criteria, were published prior to 1995 or targeted clinical populations were excluded. RESULTS: Thirty-four papers detailing results of large, population-based studies in 16 North American and Western European countries met our inclusion criteria, including 5 multi-country studies (N=69,992 participants) and 29 single country studies (N=163,188 participants); all but one were cross-sectional. Reported general prevalence rates ranged from 4% to 29% of adults, averaging $14.5 \pm 8.0\%$ across studies. Reported prevalence averaged higher in primary care populations than in populations derived from random sampling or geographically defined cohorts ($19.5 \pm 7.9\%$ vs. $12.3 \pm 7.2\%$). Diagnostic and severity criteria differed considerably among studies, as did inclusion criteria, with corresponding variation in prevalence estimates. Prevalence averaged higher in women and older adults; more limited data suggest race/ethnicity, parity, health status, and other factors may also contribute to the observed variation in prevalence. RLS has profound, negative effects on health, well-being, and quality of life, yet detection rates remain low. CONCLUSIONS: Collectively, these studies indicate that RLS is a common disorder of major clinical and public health significance in the Western industrialized world, affecting between 4% and 29% of adults. The wide variation in reported prevalence likely reflects differences in demographic factors, health status, and other population characteristics; study population source and sampling frame; and inconsistencies in RLS diagnostic criteria and procedures. Prospective studies and corresponding incidence data on RLS are lacking, hindering the evaluation of both causal factors and sequelae.

The screenshot shows a researcher profile on the Publons website. The top navigation bar includes links for BROWSE, COMMUNITY, FAQS, a search icon, LOG IN, REGISTER, and WEB OF SCIENCE. The main content area displays the researcher's name, Terry Kit Selfe, with a large circular profile picture containing the letters 'TS'. Below the name are the search term "Selfe, Terry" and a "Show more" link. The researcher is associated with the University of Florida. Key metrics shown are 30 PUBLICATIONS, 892 TOTAL TIMES CITED, and an H-INDEX of 17. There are also 7 VERIFIED REVIEWS. A green callout box highlights these publication statistics. On the left, a sidebar menu lists Summary (which is circled in green), Metrics, Publications, and Peer review. The main content area also shows research fields like CLINICAL TRIALS, COMPLEMENTARY AND ALTERNATIVE MEDICINE, and MEDITATION, along with a "+ VIEW ALL INSTITUTIONS & AWARDS" link. Below this, a section for "Most cited publications" lists an article titled "Prevalence of restless legs syndrome in North American and Western European populations: A systematic review" with 130 citations. The article is published in Sleep Medicine, Aug 2011, with DOI 10.1016/J.SLEEP.2010.12.018.

Summary Metrics Publications Peer review

Average review length

The average number of words per review (for which we have content), compared to the average of All fields reviewers and the average of reviewers at affiliated institutions.

A bar chart titled "Average review length" comparing the average number of words per review for three groups: Terry Kit Selfe, All reviewers, and University of Florida. The y-axis represents the number of words, ranging from 0 to 700. Terry Kit Selfe has the highest average review length at approximately 640 words. All reviewers have an average of approximately 370 words. The University of Florida has an average of approximately 470 words.

Group	Average Review Length (Words)

Création de profil : Scopus

How is a profile created?

Créé par Scopus

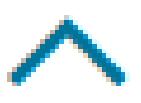

Each Scopus Author Profile is automatically generated using a dedicated matching algorithm that extracts metadata directly from documents indexed in Scopus. The metadata is all publicly visible information that the authors supply when they submit the documents for publication. The process links an author's name with the published documents that they authored, provided those documents are indexed in Scopus. It then organizes the publicly visible information (name, affiliation[s], subject area[s], publications, citations, co-authors, etc.) in a useful way for other researchers, librarians, and research leaders.

https://service.elsevier.com/app/answers/detail/a_id/29506/supporthub/scopus/kw/profile/

Création de profil : Scopus

Can a Scopus Author Profile be edited?

Profiles are automatically created using metadata from published documents, therefore profiles cannot be changed by Scopus users. However, a user can request corrections to a profile if:

- A publication indexed in Scopus has been wrongly assigned.
- The preferred name used to display the profile needs to be changed.
- A primary affiliation should be chosen from those extracted from the documents.
- Some documents indexed in Scopus are missing from the profile.

Non modifiable par l'auteur

If any corrections are required, use the [Author Feedback Wizard](#) to send a request. If an

Questions

Google Scholar Profiles

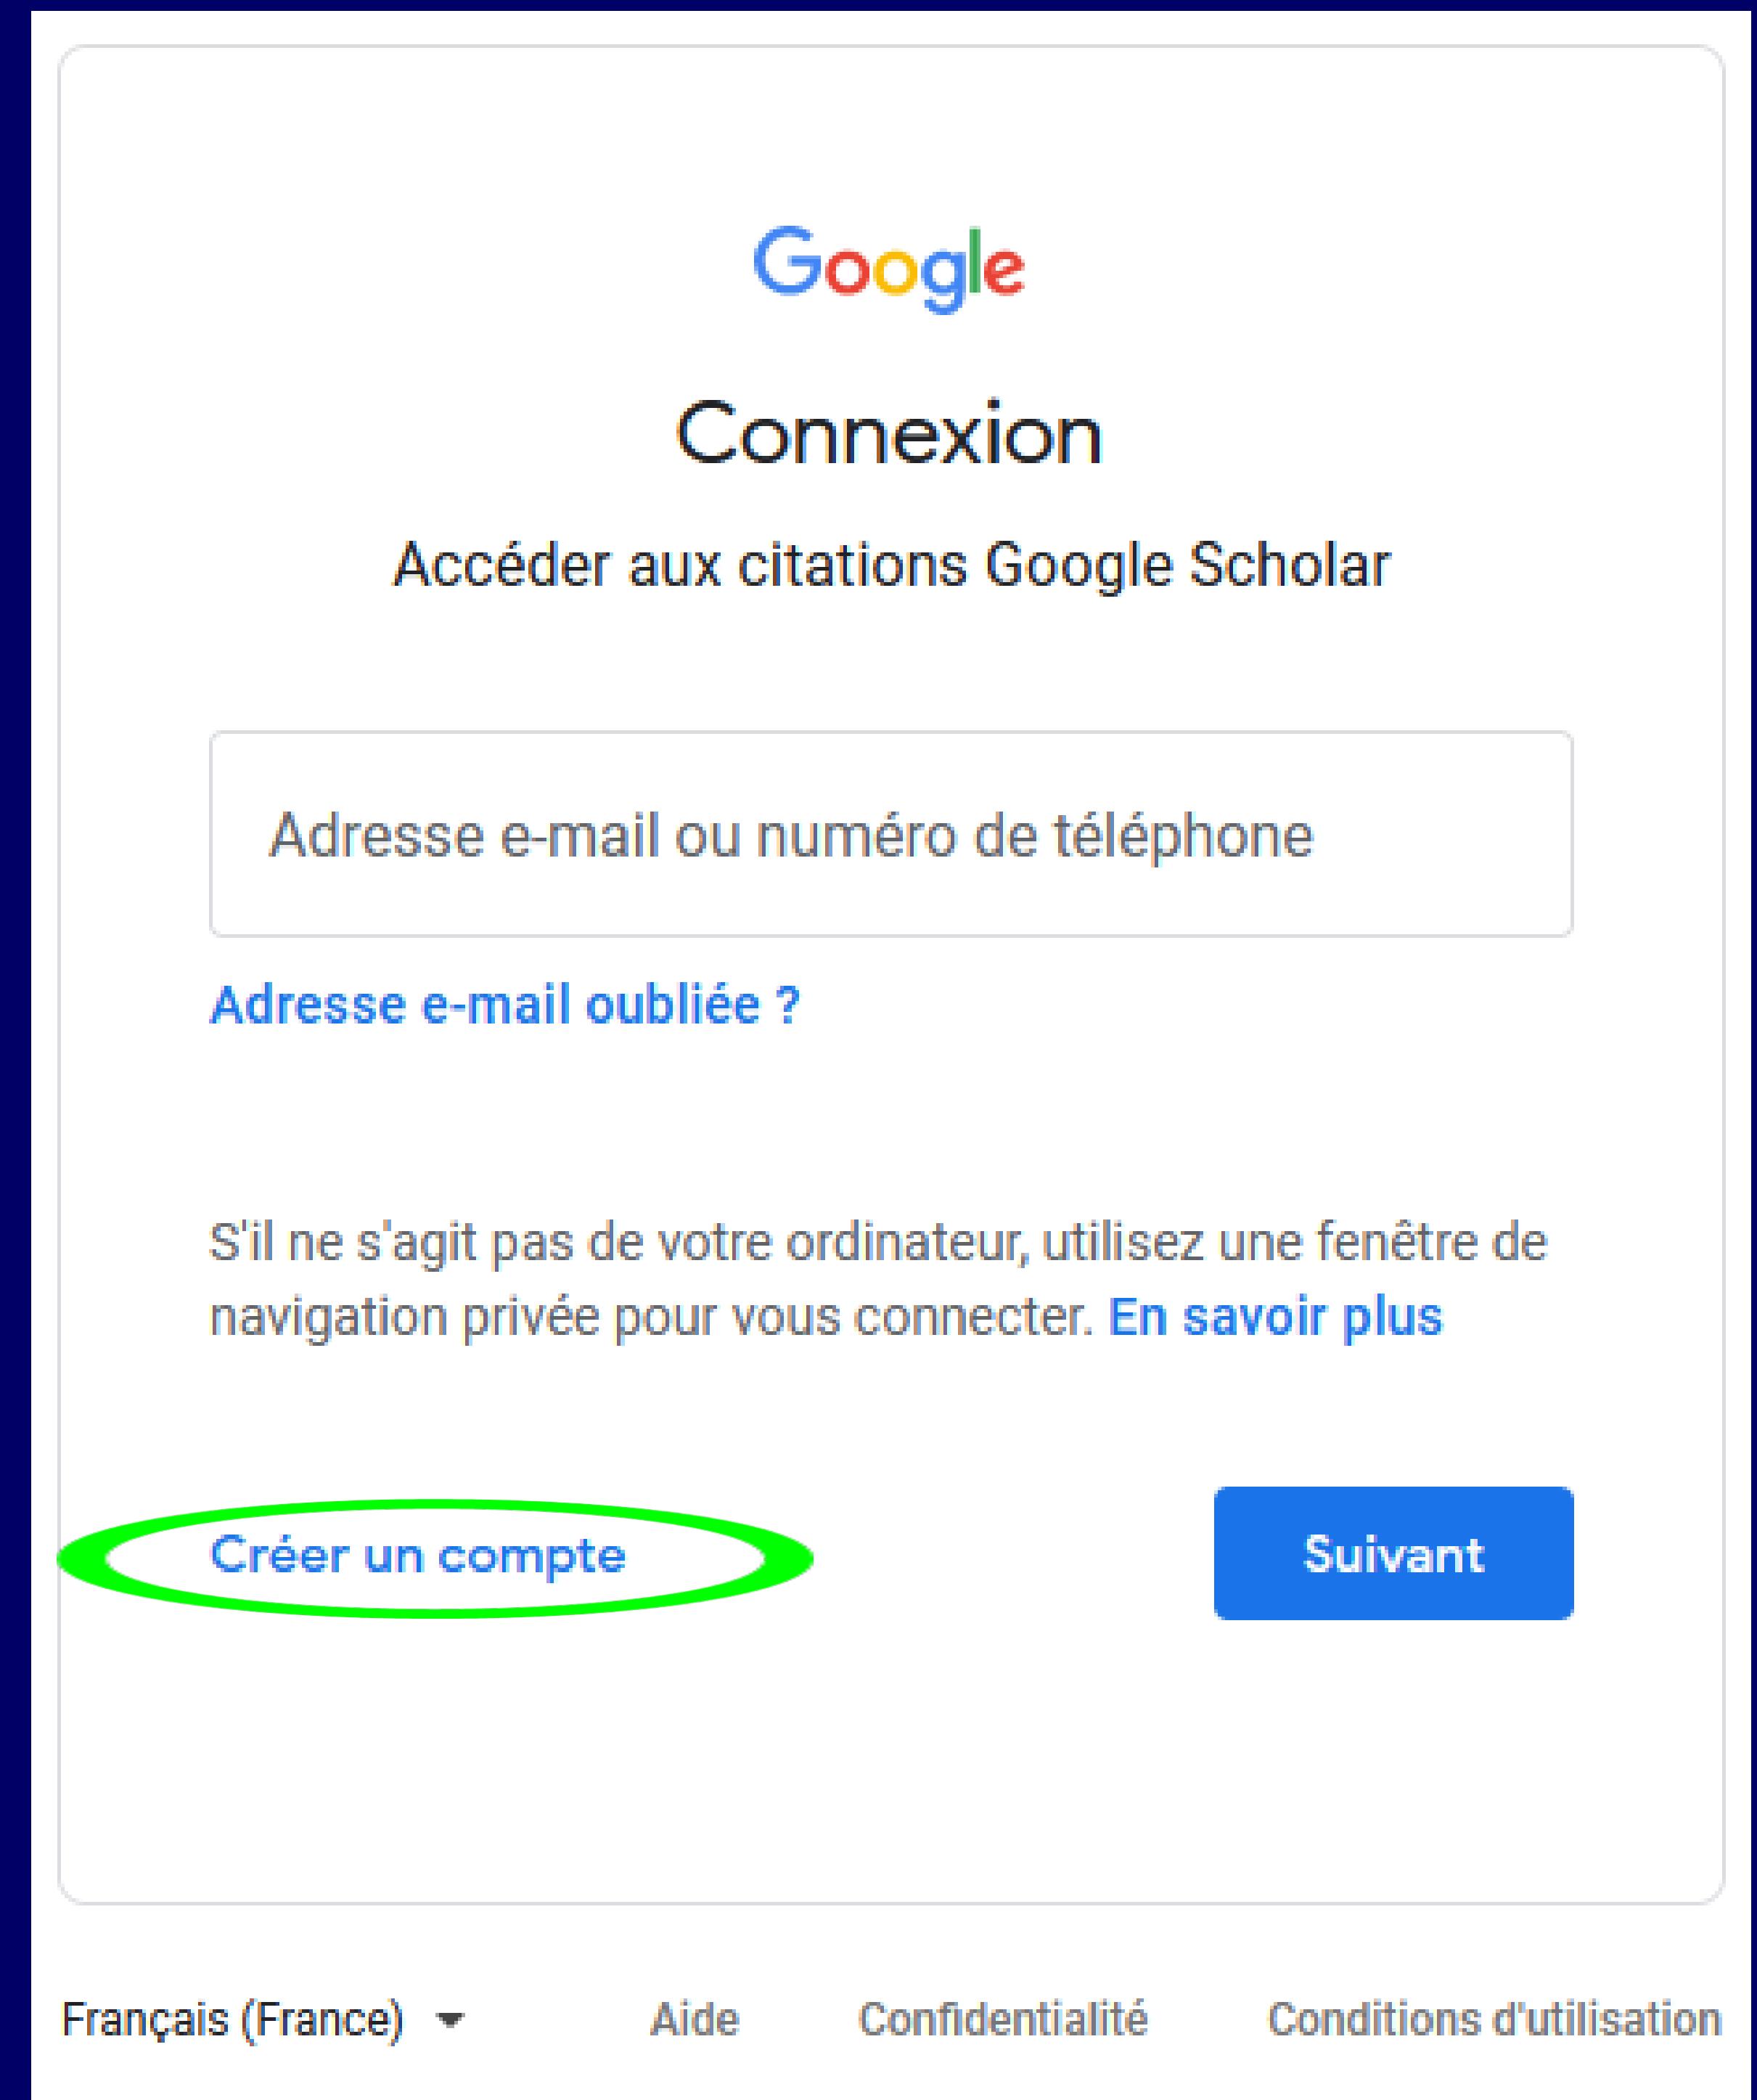

Google Scholar Profiles provide a simple way for authors to showcase their academic publications. You can check who is citing your articles, graph citations over time, and compute several citation metrics. You can also make your profile public, so that it may appear in Google Scholar results when people search for your name, e.g., richard feynman.

Best of all, it's quick to set up and simple to maintain - even if you have written hundreds of articles, and even if your name is shared by several different scholars. You can add groups of related articles, not just one article at a time; and your citation metrics are computed and updated automatically as Google Scholar finds new citations to your work on the web. You can choose to have your list of articles updated automatically or review the updates yourself, or to manually update your articles at any time.

Set up your Google Scholar Profile

Créez votre profil Google Scholar

Cliquer sur “Créer un compte”

The screenshot shows the Google Scholar login interface. At the top right is the Google logo. Below it is a large orange "Connexion" button. Underneath the button is the text "Accéder aux citations Google Scholar". A search bar is present with the placeholder "Adresse e-mail ou numéro de téléphone". Below the search bar is a link "Adresse e-mail oubliée ?". To the right of the search bar, there is explanatory text: "S'il ne s'agit pas de votre ordinateur, utilisez une fenêtre de navigation privée pour vous connecter." followed by a blue "En savoir plus" link. At the bottom left is a blue "Créer un compte" button, which is circled in green. To its right is a blue "Suivant" button. The footer of the page includes language selection ("Français (France)"), help links ("Aide", "Confidentialité", and "Conditions d'utilisation"), and a small "▼" icon.

The screenshot shows the 'Profile Settings' page on the Publons website. The sidebar on the left has tabs for 'Settings', 'Account', 'Profile' (which is circled in green), 'Affiliations', 'Email', and 'Permissions'. The main content area starts with a section for 'Alternative publishing names' containing 'Selfe, Terry; Selfe, Terry Kit; Selfe, T. K.; Terry K Selfe'. Below this is a 'Research fields' section with a text input field and a list of selected fields: CLINICAL TRIALS, COMPLEMENTARY AND ALTERNATIVE MEDICINE, COMPLEMENTARY THERAPIES, MEDITATION, MIND AND BODY MEDICINE, TAI CHI, and YOGA. A note says to add fields separately and lists existing fields will appear in a dropdown. The 'Profile display' section allows users to show alternative publishing names by checking a box labeled 'Allow others to see your alternative publishing names'. It also includes a dropdown for 'Default publication ordering' set to 'Most cited'. At the bottom is a green 'SAVE PROFILE' button.

Reviews from partners

Publons partners with journals and funders to simplify the process of getting recognition for your reviews. Whenever one of our partners provides us with review records, we can match these to the email addresses associated with your account and automatically add the review data to your profile for you.

Allow Publons to automatically add:

- All future reviews you complete for partners.
- All reviews you have completed for partners in the past, if a partner uploads that data on your behalf.

[Click here](#) to learn more about how past reviews are added to Publons.

Automatically add reviews from Publons' partners

Find out more about Publons' partnerships.

Pre-publication review display preferences

Choose default display preferences for pre-publication reviews you've written as well as those of publications you've authored.

We consider the preferences of the reviewer, author, journal, and publisher before displaying a pre-publication review and will never display more information than your preferences allow.

[Find out more about review display preferences.](#)

Créez votre profil Publons : Paramètres

The screenshot shows the 'Permission Settings' page on the Publons website. At the top, there's a navigation bar with links for 'BROWSE', 'COMMUNITY', 'FAQS', and a search icon. To the right of the search is a 'WEB OF SCIENCE' logo with a 'TS' monogram and a small red '11' badge.

The main content area has a header 'Grant review display preferences' with a sub-instruction 'Choose the display preferences of reviews you've written as part of grant review.' Below this is a dropdown menu set to 'Content' with the option 'Show review content'.

A green oval highlights the 'ORCID Settings' section. It contains a message 'You have linked ORCID record: [ID](https://orcid.org/0000-0002-2181-2011) https://orcid.org/0000-0002-2181-2011'. Underneath, there's a heading 'SYNC YOUR ORCID RECORD WITH PUBLONS' with a note: 'Tick the box below and save your settings to automatically import any publications you add to your ORCID record, when you add them to your ORCID record.' A checkbox labeled 'Keep my publication list up to date with my ORCID record' is present. A note below explains that selecting this option imports publications from ORCID to Publons and that changes made on ORCID will reflect on Publons.

Below this is a section titled 'UPDATE YOUR ORCID WORKS FROM PUBLONS' with a note: 'Click the button below to allow Publons to add your publications and verified pre-publication reviews to your ORCID record.' A button labeled 'GRANT PUBLONS PERMISSION TO UPDATE YOUR ORCID WORKS' is shown.

At the bottom, another section titled 'UPDATE YOUR ORCID RECORD FROM PUBLONS' with a note: 'Click the button below to allow Publons to keep your ResearcherID up to date on your ORCID record. Your ResearcherID will be exported to the "Other IDs" section of your ORCID record.' A button labeled 'GRANT PUBLONS PERMISSION TO UPDATE YOUR ORCID RECORD' is shown.

At the very bottom of the page is a teal 'SAVE CHANGES' button.

Tableau de bord privé Ajoutez ou supprimez des publications

The screenshot shows the Publons Private Dashboard. At the top, there is a navigation bar with the Publons logo, BROWSE, COMMUNITY, FAQS, and a search icon. On the right side of the header, there is a 'WEB OF SCIENCE' badge with 'TS' and a gear icon, and a red box indicating '11' notifications.

The main content area has a breadcrumb trail: Private Dashboard > Publication Records. The title is 'Private dashboard - My publications' for 'For Terry Kit Selfe'. On the left, a sidebar menu includes: Me (Dashboard summary, Public profile, Export Publons CV, Citation map), My records (Publications, Peer reviews, Editor records), Activity (Pending records, Notifications (11)). The 'Publications' item in the 'My records' section is circled in green.

In the center, there is a tip box titled 'Tip: Completing your publication list' with instructions on how to import publications from Web of Science, ORCID, or file upload options. Below the tip box are two buttons: 'IMPORT PUBLICATIONS' and 'FOUND 0 WEB OF SCIENCE PUBLICATIONS'. A large green arrow points from the circled 'Publications' link in the sidebar to the 'IMPORT PUBLICATIONS' button.

At the bottom of the dashboard, there is a note about importing publications from Web of Science and a link to see data sent to Web of Science.

A large green box on the right contains the text 'Importez'.

Tableau de bord privé Ajoutez des publications

The screenshot shows the Publons Private Dashboard for a user named Terry Kit Selfe. The dashboard has a dark header with the Publons logo, BROWSE, COMMUNITY, FAQS, and a search bar. A 'TS' icon with a '11' notification badge is in the top right, and 'WEB OF SCIENCE' is also present. The main title is 'Private dashboard - Import publications' for Terry Kit Selfe. On the left, a sidebar menu includes 'Me' (Dashboard summary, Public profile, Export Publons CV, Citation map), 'My records' (Publications, Peer reviews, Editor records), 'Activity' (Pending records, Notifications 11), and 'Community' (Web of Science). A central callout box titled 'Tip: Completing your publication list' provides instructions for importing publications from Web of Science or ORCID. Below the tip are four dropdown menus: 'Import from Web of Science (complimentary access for Publons users)', 'Sync with ORCID', 'Import by identifier (e.g. title or DOI)', and 'Import by file upload (RIS, CSV, or BIBTEX)'. The top right corner shows a 'Web of Science ResearcherID' link (J-8183-2017).

Tip: Completing your publication list

If you just have a handful of publications to add, try using the [DOI/title import option](#). Otherwise, use the [Web of Science, ORCID, or file upload options](#) to complete your publication list. Don't worry about duplicates; we will detect and remove duplicated publications by title and/or DOI.

Import from Web of Science (complimentary access for Publons users)

We couldn't find any unclaimed publications in the Web of Science that match your email address and/or publishing names. Try refreshing this page after adding any other email addresses and names you've published with, or use another import method below.

Conclusion

De nombreux profils sont disponibles

- E.g., Google Scholar, Scopus, Publons, Dimensions

Certains seront plus complets que d'autres

- Chaque base de données couvre différentes revues et d'autres types de publications, donc toutes vos publications ne seront pas dans chaque profil
- Il est possible que certains incluent des informations, d'autres non
 - E.g., Visualisation du réseau du co-auteur, carte des citations
- ORCID vous permet de saisir toutes vos publications
 - Ce n'est pas une base de données de citations, donc pas d'indicateurs

Si vous avez une base de données préférée pour votre profil, publiez dans des revues qui y sont indexées

Ne peut pas ajouter à votre profil des éléments non-indexés dans cette base de données

Conclusion

Identifiez les indicateurs qui reflètent le mieux votre histoire

- Nombre de citations, indicateurs normalisés, Altmetrics (indicateurs alternatifs)
 - Utilisez diverses sources étant donné que les bases de données et les profils diffèrent

Toujours fournir le contexte

- Utilisez des mots, pas seulement des chiffres
- Donnez le nom de votre source

Allez au-delà des indicateurs

- Soulignez l'impact notable
 - E.g., Directives de pratiques précises, déclarations de politiques

Récapitulons
