

FEED THE FUTURE INNOVATION LAB FOR LIVESTOCK SYSTEMS

Phase I Capacity Building in Niger

Capacity development gap analysis

- Collaborated with various research and agricultural education and training institutions supporting the livestock sector in Niger.
- Identified the training and organizational development needs critical to improve the livestock research and teaching capacity at these institutions.
- Click to review a [Summary Brief](#) and a detailed [Gap Analysis report](#).

Critical studies to improve the enabling research environment in Niger

- [Report on the Assessment of Forage and Non-Forage Laboratories in Niger](#).

Capacity building activities in Niger

- Supported numerous technical and soft skills training. Selected [training resources](#) are available online.

Phase II Local Capacity Development in Niger

The main goal for Phase 2 is to strengthen partner organizations and the enabling environment for livestock systems research.

Our **Local Capacity Development** approach is informed by the [forthcoming USAID policy](#) that focuses on improved performance of local actors and local systems in achieving and sustaining development results. We will work with local partners to identify and address systemic issues in the livestock research system through leveraging local strengths, assets and networks.
