Library Access for Success:
Accessing & Searching AGORA for Research Literature

Webinar 2 of 5  October 3, 2018
Presented by: Feed the Future Innovation Lab for Livestock Systems
WEBINAR SERIES

1. August 15: Introduction to research4life Programs
2. October 3: Accessing & Searching AGORA for Research Literature
3. October 17: Search Strategies for Successful Literature Reviews
4. October 31: How to Store Your References & Content
5. November 14: Ethics in Research Publications

REVIEW

- More than 115 countries, areas and territories

- **HINARI**: health research (up to 13,500 journals, up to 60,000 books and up to 110 other information resources, [www.who.int/hinari/en/](http://www.who.int/hinari/en/))

- **AGORA**: agriculture research (up to 10,000 journals, up to 26,500 books, up to 30 information resources) [www.aginternetwork.org/en/](http://www.aginternetwork.org/en/)
• **OARE**: environment research (up to 11,500 journals, up to 27,000 books, up to 55 other information resources, 3200 registered institutions)  [www.unep.org/oare/en/](http://www.unep.org/oare/en/)

• **ARDI**: development and innovation research (up to 7,300 journals, up to 22,000 books, up to 25 other information resources, 1000 registered institutions)  [www.wipo.int/ardi/en/](http://www.wipo.int/ardi/en/)

• **GOALI**: launched 06 March 2018, law and law related content (up to 1,800 journals, 6,900 books and 10 information resources)  [www.ilo.org/goali](http://www.ilo.org/goali) updated 2008 06
R4L: Copyright/User Agreement

• All registered institutions will sign a User Agreement covering:
  – Use of the programs’ password
  – Copyright and Fair Use

• Agreement shall be available in your institution
Use of the R4L Password

- **Do Please Share** R4L username and password with colleagues, students, faculties in your institution
- **Do not Share** with those from outside the institution
- **Do not Use** outside the country – see next slide
Specific Situations - Outside the Country use
(as of July 2018)

- Individual staff and faculty of an institution are permitted to use R4L during short-term professional trips outside the institutional environment including outside the country (e.g. 1 month maximum).

- Student at registered institutions may use R4L no matter where in the world they are located. Institutions with Distance Learning programmes should connect via IP-based logins but not distribute username and passwords to remote students.
Copyright and Fair Use

• Same as typical copyright and fair use principles: It is **OK**, for example, to:
  
  – Download or print up to 15% of a journal issue or book
  
  – Use material for educational purposes (course packs or reserves)
  
  – Make copies for institution members or students

• Be cautious but sensible
Abuse of Publisher Privileges

• It is **NOT OK** to:
  – Charge for documents, except for cost recovery for teaching materials
  – Post content to websites or blogs that are publically accessible
  – Change content
  – Download all articles from a single issue

• Violations result in the INSTITUTION or ENTIRE country denied access until the problem is resolved.
Hinari (or AGORA) can be accessed from either a computer or mobile phone – with Internet access.
Displayed are samples from the mobile phone version of the Hinari content and databases pages.
Your institution must be registered for you to gain access to the full-text electronic resources.

Click on the How to Register link to access the step-by-step guide – to see if your institution is registered or must complete this process.

For institutions who are not but could register, we have sent the registration information via email.
As of March 2018, one registration is required for all 5 R4L programs including GOALI. Previous institutional username/passwords also will grant access to all the programs. Make sure you complete all the steps noted in the How to Register link.
Username & Password

• All individuals from the institution (researchers, faculty, students, etc.) can use the institution’s username/password.

• If your institution is registered, the librarian should have the username and password.

• If your librarian does not have the login information and your institution IS registered, write to r4l@research4life.org
Login to the HINARI website by clicking on LOGIN.

Note: If you do not LOGIN to AGORA, you will not get access to the most of the full text articles, e-books and other resources.

www.fao.org/agora/en
Enter your AGORA USER NAME and PASSWORD in the appropriate boxes, change the language of the portal (if necessary), then click on the Login button.
Click on the AGORA logo to open the programme.

All the programs your institution is registered for are listed. Login to any of the other programs by returning to this page (use the R4L Portal – Applications tab at the top of the web browser). To open another program, return to this tab click on the specific logo. Your AGORA username and password will grant access to the other programs (and ditto for your institution’s ARDI, GOALI, HINARI or OARE logins).
Once logged-in, you will be taken into the Access the content sub-page of the website.

Note the ‘Logged in from: Test Account’ message. That line will list your country. This proper login also can be confirmed by the url login.research4life.org/tacsgro)extranet.who.int/…
If you fail to use the Login button from the Research4Life access page, you will have a second option on the Content page – Log in for access.
Now opened is the Browse Subject ‘Animal Sciences’ listing (without the proper login). Displayed is the default All Items tab. Of the initial list of 14 journals titles, only 7 are Full access to this content for everyone (green box) while there are 7 that are not accessible (grey box).

You must log in for access - to have full access to this content.
Journals can be accessed by title from an alphabetical list. Access to the Books Collection is identical.

For this exercise, click on ‘A’ from the A-Z list.

Note: there also is a View complete list of journals option although this list does not have hypertext links to the journals.
Initially, 25 titles are displayed. Click on the drop down menu to display 100, 500 or all the titles. Also, scroll from one page to another.
Displayed is the ‘A’ journal list with all the journals beginning with Agr. When properly logged in, the default is the Accessible Content page. Open Agroecology and Sustainable Food Systems

Note that the ‘years/volumes’ available are listed after the journal title.
Displayed is the initial page of the Agroecology and Sustainable Food Systems portal. Note the title change and link to the List of issues.

Exercise 1 – Accessing Journals by Title

• From the AGORA Content page, go to the Journals collection A-Z list.
• Find the Canadian Journal of Animal Science by clicking on C. Select it from the list by clicking on the title. (to scroll down, use the ALL option)
• The Canadian Journal of Animal Science will open on the publisher’s website. Note: there are two options!
• What is the date, volume and issue number of the latest issue?
• Select an article from the latest issue available to you and open the full text.
• What are the title and author of the full-text article you viewed?
• Why you were interested in this article and could colleagues at your institution use the information?
• Return to the Journals collection A-Z list. Choose a journal of interest to you. Select an article of interest to you.
• When you have finished, return to the AGORA Content page.
Click on the tab to find journals and books by Subject. Scroll down the drop down menu and select Food Science/Nutrition.

Note: The subject categories are available in Arabic, English, French, Russian, Spanish and Portuguese.
An alphabetical list of Food Science/Nutrition journals and e-books now is displayed with links to the journal and book websites. Note that we are looking at the Accessible Content tab for an institution with full access – so there are many Food Science/Nutrition journals listed.

Note, in the Type box, the numbers of Journals and Books in this subject are noted.
Exercise 2 - Viewing Journals by Subject Category

- From the **AGORA Content** page, click on the **Subject** list from the page’s horizontal bar. A drop down menu will appear.

- Display the list of **Animal Science** journals and books by clicking on that word. Approximately how many titles are listed in this broad subject category?

- Select the journal **Animal Health Research Reviews or a journal of interest** from the list by following the hyperlinked title.

- The **chosen journal** will open on the publisher’s website.

- Select an article from the latest issue available to you and open the full text. What are the title, author and publisher of the full-text article you viewed?

- Return to the **Subject List A-Z list**. Choose a **subject area of interest to you**. Select a journal of interest to you.

- When you have finished, return to the **AGORA Content** page.
To find journals by language of publication, click on the Languages bar in the horizontal frame. The Languages drop down menu appear and choose **Français**.
An alphabetical list of *French* language journals is displayed – a total of 1051.

Note: The editors decide the languages accepted by the journal. Some include articles in multiple languages.

Note the Type list – Journals (290) Books (50)
Now displayed is the **Browse publisher** drop down menu. This **You have full access to:** list is for an institution where all the material is included in the publishers’ offer.
Now displayed is CABI Publishing Books. Via the Accessible Content list, the green boxes note all the book titles that are available.
Scroll down and view the Publishers list of journals for an institution that does not have full access to the all publishers resources.

In the individual publisher’s All Items list, the grey box with ! will be displayed.
Now displayed is CABI Publishing Books for an institution where the Publisher does not grant access. There are no books in the Accessible Content list,
Displayed is CABI Publishing Books for an institution where the Publisher does not grant access. ! (no access icon) is displayed for books in the All Items list,
Exercise 3 - Using the Publishers List Option

• From the AGORA Content page, click on the Publisher list from the page’s horizontal bar. A drop down menu will appear.

• Open the list of journals for the publisher Bioline International.

• In AGORA, approximately how many journals are available from this publisher?

• What titles would be of interest to you or someone at your institution?

• From a title of interest to you, select the latest Issue and choose an article to open in full text. What are the title, author and issue of the full-text article you viewed?

• Click on a publisher of interest to you. Which AGORA journals listed are of specific interest and why?
From the AGORA Content page, you also can open the Databases for discovery, Reference sources and Free collections lists.

Note: Many of these resources are underutilized by AGORA users as most individuals concentrate on obtaining full-text journal articles.
Via clicking on the Databases for discovery link, now opened is the Browse databases A-Z list. Note that Google Scholar and Scopus are listed.
Google Scholar searches for academic material and, via the links in the search result's right column, you can access full-text material including what is available from AGORA. The use of Scholar will be discussed in a subsequent webinar.
Now opened the initial page of Scopus (Elsevier), a large abstract and citation database of peer-reviewed literature and quality web sources with smart tools to track and analyze research.

Being from a Research4Life registered institution, and having logged into AGORA, you will be able to use these resources from various publishers.
Click on the Reference sources link from the Content page and open the Browse reference sources A-Z list. Many of these resources contain full-text information on a variety of topics.
What Is Summon?

• Summon is a Google-like search engine that provides fast, relevancy-ranked results:
• Enter the search terms into a single search box or select Advanced Search options from the results page
• Refine (limit) results by criteria such as date, subject, academic journals and other options
• View results, and link directly to full text or more details
• Contains links to AGORA resources in e-journals and e-books. All R4L programs have this tool.
From the Content page, open the Search inside AGORA full-text Using Summon. Note the option for Country specific search results. Search food security and drought.
A list of Summon (country) search sites is displayed. Go to a specific country search profile on the list and click on the link. You will have access to ejournals and ebooks that, via AGORA, the publishers have granted access to in the specific country. For this presentation, Cambodia (a FeedtheFuture participant) will be opened.
If your country is not listed in the Summon search sites, it does not have a profile. Go to HINARI Summon General Use at the bottom of the list and click on this. This General Use category is for countries where the publishers have granted access to all or almost all resources.
Enter high protein forage and dairy production and developing countries in the Search box and click on Search. Note the icon to the Advanced Search option.
Using the general search tool on the Hinari content page, the search returned **13,512 results**. The availability of full-text articles and books is noted by a link.

In the left column, there are numerous ways to **Refine your search** including **Content Type** and **Subject Terms** options. **Content Type** includes all material available from HINARI – Journal Articles, eBook, Book Reviews, Report...
Webinar 3:
Search Strategies for Successful Literature Reviews
17 October 2018
Register now: http://LivestockLab.ifas.ufl.edu/events/

• Preparation: By 10 October, send completed search strategies to Michelle Leonard: mleonard@uflib.ufl.edu
  – We will review the searches and use them as examples
  – Webinar 3 will include an overview of free Internet resources – useful on the academic level

• Support for AGORA registration, contact
  Dr. Lenny Rhine: rhinel@ufl.edu

Webinar 4, October 31: How to Store Your References & Content
Webinar 5, November 14: Ethics in Research Publications
DISCLAIMER

This presentation is made possible by the generous support of the American people through the United States Agency for International Development (USAID) and its Feed the Future Innovation Lab for Livestock Systems managed by the University of Florida and the International Livestock Research Institute. The contents are the responsibility of the University of Florida and do not necessarily reflect the views of USAID or the United States Government.
